

## **Section 1. Product and Manufacturer Identification**

Product Name: CD137 (4-1BB) HEK293 Recombinant Cell Line

Catalog Number: #60691

**CAS number:** Not available.

**Recommended Usage:** This product is intended for use in a research setting for the

growth of cell culture.

This product is sold only for research use by qualified

laboratory personnel, and is not to be used as a drug, medical device, food additive, cosmetic, nor household chemical. It is not to be used in diagnostic, therapeutic, consumer, and

agricultural applications.

Manufacturer Information: BPS Bioscience, Inc.

6405 Mira Mesa Blvd., Suite 100 San Diego, CA 92121 USA.

Tel: 1-858-202-1401 www.bpsbioscience.com

For a complete list of components shipped with a product, please review the product datasheet, which is available on our website at www.bpsbioscience.com. A safety datasheet for each component is available upon request.

# Section 2. Hazard(s) Identification

#### **Hazard Classification**

Not a hazardous substance or mixture according to United States Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (29 CFR 1910.1200).

Hazard not otherwise classified (HNOC)

Biosafety Level 2 - Agents associated with human disease and

pose moderate hazards to laboratory personnel and the

environment.

n/a

Signal Word

Hazard Pictograms: n/a

# Safety Data Sheet

Health Hazards: Resp

Respiratory sensitization	0
Skin sensitization	0
Reproductive Toxicity	0

Physical Hazards: Not hazardous

Environmental Hazards: Not hazardous

Hazard Statement(s): Not hazardous

## **Precautionary statements**

Prevention: Not Applicable

Response: Not Applicable

**Storage:** Follow storage recommendations from product datasheet.

Disposal: Not Applicable

Other Hazards: Not Applicable

**HMIS** 

Health	0
Flammability	0
Reactivity	0

## Section 3. Composition and Information on Ingredients

Component	CAS No.	Common Name	EINECS-No	Classification	Weight-%
Dimethyl sulfoxide	67-68-5	DMSO	200-664-3	Flam. Liq. 4; H227	>= 5, <15%

Contains fetal bovine serum or calf serum. The physical properties of this product have not been investigated thoroughly. We recommend handling all chemicals according to good lab practices, with proper personal protective equipment, proper engineering controls, and within the parameters of the purchaser's chemical hygiene plan.

Fetal bovine serum (FBS) is FBS is ISIA-certified and sourced from the United States of America. No viruses or bacteria are known to be present; however, appropriate precautions for biological materials should be used.

# **Section 4. First Aid Measures**

### **Description of First Aid measures**

**Skin contact:** Remove and wash affected articles of clothing immediately and

rinse skin with soap and water for 15 minutes. Immediate medical

attention is not required.

Eye contact: Rinse immediately with water for several minutes, including under

the eyelids. Remove contact lenses, if present and easy to do.

Rinse for at least 15 minutes.

**Ingestion:** Rinse mouth with water. Do not give anything by mouth to an

unconscious person. Call a POISON CENTER/doctor if you feel unwell. Do not induce vomiting without medical advice. Never give

anything by mouth to an unconscious person.

**Inhalation:** Remove source of exposure or move person to fresh air and keep

comfortable for breathing. Get medical advice/attention if you feel

unwell or are concerned.

**Notes to Physician:** Treat symptomatically.

#### Most important symptoms and effects, both acute and delayed:

No known significant effects or critical hazards.

Indication of any immediate medical attention and special treatment needed: No data available.

## **Section 5. Fire Fighting Measures**

**Suitable extinguishing media** Water spray. Carbon dioxide (CO2). Foam. Dry

chemical. Use caution when applying carbon dioxide

in confined spaces.

**Unsuitable extinguishing media** No data available.

Special hazards arising from the

substance or mixture

None known.

Special protective equipment for

firefighters

Standard procedure for chemical fires.

## Section 6. Accidental Release Measures

Personal precautions and protective equipment

Ensure adequate ventilation, and avoid breathing vapors, mist or gas. Avoid dust/aerosol formation. Isolate hazard

area and keep unauthorized personnel away.

Remove all sources of ignition.

Always wear recommended Personal Protective Equipment. See section 8 for more information.

**Emergency procedures** Evacuate personnel to safe areas. Wear Personal

Protective Equipment and keep unprotected individuals

away.

**Environmental precautions** Stop spill/release if it can be done safely. Do not allow

product to reach ground water, water course or sewage

system.

Methods and material for containment and cleaning up

BSL-2 labs require immediate decontamination after spills. Do not allow anyone inside the area or room where the spill occurred. Allow aerosols to settle; wearing protective clothing, gently cover spill with paper towel and apply 10% sodium hypochlorite, starting at perimeter and working

towards the center; allow sufficient contact time before cleanup (30 min). Wipe surrounding areas (where the spill may have splashed) with disinfectant. Clean up spills immediately. The use of additional PPE may be necessary for cleaning solutions.

**Reference to other sections** See section 8 for more information.

## Section 7. Handling and Storage

**Precautions for Safe Handling** Avoid contact with skin and eyes.

Use aseptic procedures. Use personal protective equipment as required by BSL-2 regulations. Do not eat, drink, or smoke in working areas.

Ensure good ventilation/exhaustion at the workplace.

Prevent formation of aerosols.

Wash hands thoroughly after leaving the laboratory.

Decontamination of work surfaces daily, after finishing work

and following spills.

Standard microbiological practices should be followed.

Precautions for protection against explosions and fires

Keep ignition sources away - Do not smoke.

The product is not flammable.

Precautions for minimizing the release of the chemical into the environment

No special environmental precautions are needed. Avoid

discharge into drains and waterways.

Conditions for safe storage, including any incompatibilities

Keep container tightly sealed in a dry, cool and well-

ventilated place.

Recommended storage temperature: As described in

technical data sheet.

Storage class (TRGS 510): 12: Non-Combustible Liquids

# Section 8. Exposure Controls, Personal Protection

### **Control Parameters**

Chemical Name	OSHA PEL	OSHA PEL (Ceiling)	ACGIH OEL (8-hour TWA)	ACGIH OEL (STEL)
Dimethyl	-	-	250 ppm [USA WEELs,	-
sulfoxide			AIHA 2003]	

The lists that were valid during the creation of this document were used as basis.

## **Engineering Measures**

Ensure adequate ventilation, especially in confined areas. Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday.

### **Exposure Controls**

## **Personal Protective Equipment (PPE)**

Respiratory protection

In case of insufficient ventilation wear respirators and components tested and approved under appropriate government standard, such as NIOSH (US) or CEN (EU).

Hand protection

Handle with suitable impervious gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands.

#### **Recommended Gloves**

Splash contact

Material: Nitrile rubber

Minimum layer thickness: 0.2 mm Break through time: >10 min

Material tested: uvex u-fit strong N2000 chemical protection glove (UVEX Article number: 60962)

test method: EN374

If used in solution, or mixed with other substances, and under conditions which differ from EN 374, contact the supplier of the CE approved gloves. This

recommendation is advisory only and must be evaluated by an industrial hygienist and safety officer familiar with the specific situation of anticipated use by our customers. It should not be construed as offering an approval for any

specific use scenario.

#### Remarks:

Supplementary note: The specifications are based on information and tests from similar substances by analogy.

Due to varying conditions (e.g., temperature or other strains) it must be considered that the usage of a

chemical protective glove in practice may be much shorter than the permeation time determined in accordance with EN 374.

Since actual conditions of practical use often deviate from standardized conditions according EN 374, we recommend using the chemical protective glove in practice not longer than 50% of the recommended permeation time. Wash hands with soap and water after removal of contaminated gloves.

Manufacturer's directions for use should be observed because of manufacturer-specific differences in products.

**Eye protection** Tight sealing safety goggles with side-shields conforming

to NIOSH (US) or EN 166(EU).

**Body protection** Wear suitable impervious protective clothing.

**Hygiene measures**Handle in accordance with good industrial hygiene and

safety practice.

**Environmental exposure** 

controls

Do not allow product to reach ground water, water course,

or sewage system.

# Section 9. Physical and Chemical Properties

### Physical and chemical properties

Physical state Frozen liquid

Odor No data available
Odor threshold No data available

**pH** 6-8

Molecular weight No data available

Melting Point / melting range -10°C to 2°C

Boiling point / boiling range

Flash point

No data available

**Evaporation rate** No data available Flammability (solid, gas) No data available **Upper explosion limit** No data available Lower explosion limit No data available **Vapor Pressure** No data available No data available Vapor density Relative density No data available **Specific gravity** No data available Solubility No data available Partition coefficient: n-octanol/water No data available **Viscosity** No data available **Explosive properties** No data available **Oxidizing properties** No data available Other information No data available

## Section 10. Stability and Reactivity

**Chemical Stability** Stable under normal conditions.

Possibility of hazardous reactions No dangerous reaction known under conditions of

normal use.

Conditions to avoid No data available

**Incompatible materials** Strong oxidizing agents

Hazardous decomposition products Hazardous decomposition products formed under

fire conditions. - Carbon oxides, Sulphur

Oxides, formaldehyde

Other decomposition products - No data available

**Polymerization** Hazardous polymerization does not occur under

conditions of normal use.

# **Section 11. Toxicological Information**

**Acute toxicity** 

<b>Chemical Name</b>	Oral LD50	Dermal LD50 Inhalation LD50 (		Concentration / %

## **Section 12. Ecological Information**

**Ecotoxicity** Substance: DMSO

**Toxicity to fish:** 

LC50

Species: Danio rerio (zebra fish)

Value: > 25,000 mg/l Exposure time: 96 h

Method: OECD Test Guideline 203

**Substance: DMSO** 

**Toxicity to aquatic plants:** 

EC50

Species: Pseudokirchneriella subcapitata (green algae)

Value: 17,000 mg/l Exposure time: 72 h

Method: OECD Test Guideline 201

**Substance: DMSO** 

**Toxicity to Microorganisms:** 

EC50

Species: activated sludge Value: 10 - 100 mg/l Exposure time: 30 min Method: ISO 8192

**Substance: DMSO** 

Toxicity to aquatic invertebrates:

EC50

Species: Daphnia magna (Water flea)

Value: 24,600 mg/l Exposure time: 48 h

Method: OECD Test Guideline 202

Persistence and degradability

Substance: DMSO Biodegradation: 31 % Exposure time: 28 d

Result: Not readily biodegradable.

Method: OECD 301 D

Bioaccumulative

potential

No information available

Mobility in soil No information available

**Results of PBT and vPvB** No information available

assessment

Other adverse effects Do not dispose into surface water or sanitary sewer system.

# **Section 13. Disposal Considerations**

### **Disposal of Product**

It is the responsibility of the user of the product to determine at the time of disposal whether the product meets local criteria for hazardous waste. Waste management should be in full compliance with federal, state and local laws.

## **Section 14. Transport Information**
